

# Prepare for 2030: The Economic Singularity

By Raoul Pal

## *“You Have 6 Years to Make as Much Money as Possible”.- Raoul Pal*

---

**Welcome to Real Vision and thank you for downloading Raoul Pal’s guide, Prepare for 2030: The Economic Singularity.**

This guide is designed to help you navigate the profound economic changes that are already shaping the future. In it, Raoul shares essential strategies and insights to take control of your financial future over the next six years. His message? Time is of the essence—now is your chance to prepare for a new age defined by exponential growth in technology, AI, blockchain, and energy innovation.

This PDF serves as your companion to Raoul’s *Prepare for 2030* video, where he explains the unique concept of an “economic Singularity” and the extraordinary opportunities it presents. The guide brings together key themes from the video, making it easier for you to understand the transformative shifts ahead and to take action.

If you’re new to finance, you’re in the right place. Alongside this guide, you have a free Real Vision membership—your gateway to expert insights, cutting-edge tools, and a community focused on making sense of finance in a changing world. We’re here to support you on every step of this journey.

**Welcome to Real Vision. Let’s prepare for the future together!**

# Introduction: Embrace the Opportunity

---

The next six years offer unprecedented opportunities to create wealth and secure your future. With rapidly advancing technologies and financial landscapes, we're on the brink of an economic shift that will change everything. This guide will help you take actionable steps to prepare for these changes, even if you're new to finance or investing.

## Section 1: Understanding the Exponential Age

---

### The Landscape Ahead

- **Economic Singularity:** By around 2030, the frameworks we use to understand finance and markets may no longer apply. We're heading toward a world where AI, robotics, and new technologies will reshape every industry.

- **Core Drivers:**

**AI & Robotics:** Infinite productivity and intelligence through automation.

**Renewable Energy:** Falling energy costs are making it cheaper to create and distribute goods.

**Blockchain Technology:** A system for securely creating and storing value in a digital world.

## Section 2: Building Wealth—Starting with What You Have

---

### 1. Assess Your Current Financial Position

- **Set a Baseline:** Understand your monthly budget, debt obligations, and savings. Prioritize creating an emergency fund if you don't have one yet.
- **Determine Your Investment Goals:** Think about how much you'd like to save, invest, and grow over the next six years. Set practical goals based on your current income and lifestyle.

### 2. Start Small with Investments

- **Easy Investment Options:**

**Crypto:** A good long-term choice in this new age, but start with a manageable amount. Research and only invest what you can afford to lose, as this market can be volatile.

**Stocks & ETFs in Tech & Blockchain:** Raoul highlights the importance of investing in tech and blockchain, as they're the main drivers of growth. Look for funds or stocks that focus on technology, AI, and crypto.

**Invest in Yourself:** Whether it's learning about crypto, blockchain, or financial markets, prioritize skills that will make you valuable in the economy of tomorrow.

## Section 3: Action Plan for the Next 6 Years

---

### Phase 1: The First 2 Years - Learning and Experimentation

- **Begin with Education:** Dedicate 30 minutes each day to learning about one area of finance, investing, or technology.
- **Build Your Portfolio Slowly:** Start small in crypto and tech stocks. Experiment with a small percentage of your income, aiming to diversify as you learn.
- **Stay Informed:** Follow resources that explain finance and technology in simple terms (like Real Vision). Knowledge will help you avoid impulsive decisions.

## Phase 2: The Next 2 Years - Strategic Growth

- **Invest Consistently:** Add funds to your investment portfolio each month, prioritizing tech, AI, and blockchain.
- **Consider Community Investments:** Look for ways to join investment communities or forums. Engaging with others will give you insights and keep you motivated.
- **Build Connections:** Consider joining online forums or communities centered on tech, blockchain, and finance. Connect with like-minded individuals.

## Phase 3: Final 2 Years - Building Wealth & Security

- **Maximize Your Assets:** Evaluate your current investments and make adjustments as the landscape evolves.
- **Focus on Lifestyle Goals:** Ask yourself how much financial freedom you've achieved and what lifestyle goals are still unfulfilled.
- **Prepare for Change:** Keep updated on the economic landscape, so you're ready for shifts. Be adaptable and open to new opportunities, like tokenized assets or digital communities.

## Section 4: The Power of Community and Collective Wealth

---

- **Join or Create a Community:** Whether for learning or investing, communities offer insights, support, and shared goals.
- **Leverage Collective Knowledge:** In times of rapid change, staying connected with knowledgeable individuals will give you a better chance to make informed decisions.
- **Digital Ownership:** As the world becomes more digital, consider owning assets within online communities—think of it as a way to future-proof your wealth.

## Section 5: A 30-Day Quick Start Plan

---

This checklist will help you take daily steps toward building your financial knowledge and portfolio.

1. **Days 1-5:** Set financial goals, calculate a budget, and establish a realistic savings goal.
2. **Days 6-10:** Spend 15 minutes daily reading about blockchain, crypto, or tech investing basics.
3. **Days 11-15:** Create an account on a trusted exchange or brokerage to start exploring small investments.
4. **Days 16-20:** Review your portfolio and consider adding to it with \$20-\$50 in diversified investments.
5. **Days 21-25:** Join an online community or forum for finance beginners.
6. **Days 26-30:** Set a reminder to review your budget and progress each month.

## Closing: Take Control of Your Financial Future with Real Vision

---

The exponential age will be challenging, but it's also filled with potential. Lean into this shift by investing in technology, staying informed, and building wealth with intention. By following this guide, you're taking the first steps toward a secure, adaptable financial future.

The next six years are your opportunity to build lasting wealth and resilience. As you embark on this journey, staying informed and connected with the right tools and insights will make all the difference. Real Vision is here to be your go-to hub, giving you access to expert analysis, a powerful network, and in-depth resources to help you navigate this transformative time.

Whether you're new to finance or deepening your knowledge, Real Vision offers everything you need to stay ahead of the curve. By joining our community, you're not just investing in financial insights—you're investing in a future where you're prepared to thrive.
